Art Unit: 2652

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 and 19-27, drawn to an actuator assembly for a disc drive, classified in class 360, subclass 264.7.
- II. Claims 9-18, drawn to "An information handling system", classified in either class 369, subclass 78.01 or class 216, subclass 89.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II can be applied to any "information system" which is not needed to be class 360; Here, the information can be any system, not a disk drive. See MPEP § 806.05(d).

In order to avoid the restriction, applicants should amended claim 9 included a limitation which is referred to the actuator for a disc/disk drive only.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A suggestion was mailed in the previous Office Action on 3/7/03 to avoid the above restriction requirement, but did not result in an amendment being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
